

ERIC AREITER, MD JOINS NEWSOM EYE!

Dr. Eric Areiter is a cataract and glaucoma surgeon who brings expertise to our Newsom Eye team in the management and treatment of many eye conditions and diseases. He is passionate about providing your patients with the most advanced care available through the latest surgical and medical techniques. Dr. Areiter's top priority is personalizing care to the individual patient to ensure they have the best visual outcome that matches their lifestyle.

In addition to cataract and glaucoma surgery, Dr. Areiter manages a wide range of eye conditions including diabetic retinal disease, macular degeneration, plastic surgery, and corneal diseases. He graduated cum laude with a major in Neurobiology from Cornell

University before working as a researcher and scientist there for two years in the Neurobiology and Behavior department. He then earned his medical degree from the University of Virginia, and did an intern year in surgery and general medicine at Tufts University in Boston, Massachusetts. Following this, he completed a rigorous residency program at Tulane Medical Center in New Orleans, Louisiana where he performed among the most surgical procedures of any resident over the past decade across every subspecialty of ophthalmology.

Dr. Areiter was born and raised in Port Washington on Long Island, New York and is a lifelong Mets fan. He enjoys cooking, especially Italian food, with vegetables fresh from his home garden. He also enjoys spending time with his wife, three young boys, and two French bulldog-Boston terrier dogs. As a family, they love to play tennis, swim, and go to the beach.
